

AMENDMENTS TO THE SPECIFICATION

Please replace the Abstract of the Disclosure beginning at p. 38, ln. 2 with the following rewritten paragraph:

An image sensing apparatus an image sensing unit, an authentication data generating unit, a storing unit and a display unit. The image sensing unit generates image data. The authentication data generating unit generates authentication data used to authenticate whether the image data is altered. The storing unit stores an image file including the image data and the authentication data in a removable memory. The display unit displays both reduced image data obtained from the image file and a predetermined information, if the image file has the authentication data, wherein the predetermined information indicates that the image file has the authentication data.
